Save & Share Cart for WooCommerce

Part 1: Introduction

*** Previously know as Email Cart for WooCommerce ***

Empower anyone using your store to Save & Share their Cart

Save & Share Cart enables anyone to save their carts - simple products, variation products, add-on products, any kind of product - and get a unique link to retrieve the cart later. Click on the link in a chat, social-media, email, bookmark or anywhere and retrieve the cart at any time. There's also a button to send the cart in a styled email showing the products, product pictures, quantities, totals and a big button to click and retrieve the content of that cart. Save & Share Cart empowers shop managers and improves the shopping experience of all your customers - here's some examples:

Customers Save a cart to use it later

Customers can fill their cart in the morning, then without losing that work they can save the cart to retrieve it later, the next day, or whenever they like.

Customer send a cart to someone else to pay

Customers can be the one to create a cart then send it to someone else who can retrieve it and checkout and pay for them.

Pre-fill a cart to assist your customers

Shop Managers can help their a customer via phone, chat, social-media or email by pre-filling a cart then sending it to them so they can fill their cart with one click.

Bundle products for a promotion

Shop Managers can pre-fill a cart, save it - giving it a memorable name - then use the unique link in a promotion on their site, in a email campaign, on social media, in an ad banners, or anywhere.

Happy Shopping!

Part 2: Documentation

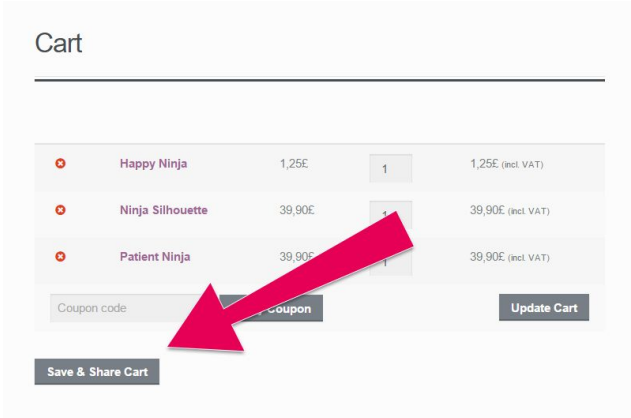
Installing the plugin:

- Make sure that WooCommerce is installed and working on your site. For instructions on installing the WooCommerce plugin see here.
- Install the plugin into your WordPress installation by following the normal steps here.

Saving & Sending a Cart

Saving and sharing a cart is done the same way for Customers and Shop Managers - by clicking on a Save & Share Cart button. The small difference is that Shop Managers will have a chance to name the cart before they save it - saved carts help identify the cart, and saved carts are not deleted (if that option is active). Here is how it works.

- ***Customers*** find the Save & Share Cart button on the Cart page.



- ***Shop Manages*** find the Save & Share Cart button above the list of saved carts in wp-admin
